## EASY TO CLEAN - WILL NOT STAIN

We have been professionally supplying etched glass since 1990. In that time, we have developed techniques to protect the etched glass surface without the use of chemicals or changing the etched glass appearance. As a result our glass is easy to clean and is maintenance free.

## CUSTOM DESIGN

If you want a truly unique, one-of-kind design, we specialize in creating custom patterns. Give us your ideas and we will work with you to help you realize your vision. Whether it is something scenic or just a simple thing like incorporating a child's name on a door, we can do it.

## DESIGNS BY STYLE

Whether you have a contemporary space, traditional or a flare for abstract, we have designs & styles to suit almost every category of personal taste.

## LOW MAINTENANCE

We have been professionally supplying etched glass since 1990. In that time, we have developed techniques to protect the etched glass surface without the use of chemicals or changing the etched glass appearance. As a result our glass is easy to clean and is maintenance free.

## BEAUTY MEETS STRENGTH

All of our glass door designs are etched onto tempered glass. We recommend tempered glass because it is typically 4-6x stronger than regular float glass & the best choice for doors that get a lot of use.
