CUSTOMIZATION

Looking for a truly unique, one-of-a-kind design? We specialize in creating custom patterns. Give us your ideas and we will work with you to help you realize your vision. Whether it is something scenic or a simple thing like incorporating your address on your door, we can do it.

PRIVACY

One of the great things about etching is the ability to maintain privacy while still allowing all the natural light into your home. We can control the level of translucency to create beautiful patterns while maintaining adequate privacy for your glass.

LOW MAINTENANCE

When we sandblast glass, we are creating our patterns right into the surface of the glass. When we construct this glass into sealed units, the etched side of the glass is intentionally put inside the unit to ensure the pattern never gets touched which ensures it never gets soiled or dirty.

MULTIPLE SIZES & ORIENTATIONS

Combine Doorlite panels with sidelights or matching transoms. Just about every combination imaginable.
